

**PROFILE - DARREN COLLINS**  
**DICA SECRETARY & PUBLIC OFFICER**

Darren Collins is a graduate of DISC 2017. He was first elected to the DICA Secretary and Public Officer role in Feb 2018 and re-elected for a second term at the Dec2018 AGM.

A mechanic by trade, Darren has worked in the industrial sales industry for the past 15 years, and in that time completed numerous Sales and Marketing Courses, including Project Management.

In the last 9 years, industrial sales roles have seen him become heavily involved with the defence sector supplying and managing tooling control systems, mainly for the RAAF servicing air bases throughout SA/NT, and more recently WA. With the increasing tempo of ship construction and repair business in Australia, Darren's work with clients in the defence industry sector has grown accordingly.

In his role with Henschman Aerospace, Darren is currently working closely with the RAAF to develop an Automated Tool Control System to eliminate FOD risks.

Darren is keen to be part of DICA and is passionate about growing its networking capabilities.
